

The Problem

Most growth-stage companies face a gap. Insurance brokers offer free risk reviews but push their products. Consulting firms offer quality advice but price it for enterprises.

Free advice tied to an insurance sale isn't independent

Big Four pricing assumes you're a multinational

Growth companies need risk guidance they can afford

The market leaves room for a third option.

Advice Without Placement Conflict

**Real independence means your adviser isn't selling you a product.
We're paid for advice, not commission.**

**Recommendations based on your actual risk,
not sales targets**

**You get Big Four analysis at pricing that
makes sense**

**No insurance placement pressure. While
we can facilitate through our partners there
is no obligation as a fee paying client**

When you pay for advice, the advice works for you.

Risk Advice Built for Asia's Market

Asia's digital economy moves fast. Regulators expect different things than Western markets. Your risk framework needs to reflect that.

We understand Hong Kong, Singapore, and APAC regulations

We know how Asian regulators think about risk

Frameworks built for Asia, not translated from the West

We offer three core services

1

Risk Programme Review

Most companies have insurance scattered across vendors, with gaps nobody's mapped. A Risk Programme Review shows you what you actually have and what you don't.

Complete audit of all insurance and risk cover

Identifies gaps and overlaps you haven't seen

Board and investor ready reporting

You can't manage what you don't see.

USD 6,500
Fixed fee • 4 weeks

2

Risk Framework Design

Regulators expect risk frameworks. Investors want to see governance. We design frameworks that satisfy both—and actually work.

Risk governance structure aligned with your stage

Board-ready risk reporting and oversight

Investor confidence in your risk maturity

Governance that looks good and works well.

USD 12,000 – 20,000

Fixed fee • 6–8 weeks

3

Retained Risk Advisory

You need continuous risk oversight but don't need to hire a full-time Chief Risk Officer. Retained advisory keeps you covered without the headcount.

Quarterly risk reviews and advisory updates

Continuous support as your company grows

Scale from fractional to full-time as needed

Risk expertise when you need it, not a full salary.

USD 3,500 – 7,000 / month
Monthly retainer • Ongoing

Start With a Discovery Call

Understanding your risk profile and where you need help takes 30 minutes. No sales pitch. Just questions and honest answers about what you actually need.

Advice you pay for is advice that works for you.
