DIGITAL ASSETS

Binance Security Incident

Developing reports of a potentially multibillion-dollar digital-asset security incident. Binance is investigating. Recoveries and the final loss are uncertain.

TOKENISATION

Hong Kong SFC and DTCC

Hong Kong's SFC approved secondary trading of tokenised public funds, while DTCC launched its tokenisation service.

AI & CYBER

AI-Assisted Security Testing Involving Anthropic

Authorised researchers reportedly used AI tools to identify weaknesses in third-party software connected to Anthropic's internal systems. This was authorised testing, not a confirmed criminal intrusion.

DIGITAL INFRASTRUCTURE

EDK II Firmware Vulnerability

A disclosed EDK II network-boot firmware vulnerability. Exposure is conditional.

Continuum

The challenge isn’t simply preventing technology failures.

It’s understanding how their failure could translate into financial loss. For digital-asset businesses, insurance belongs within a broader financial resilience strategy alongside security controls, capital reserves, and potentially captive arrangements.
